Dear Parents or Guardian,

The University of Pittsburgh cares deeply about the health and well-being of every student; and we understand the importance of making high-quality, easily accessible, affordable health care available for your college student.

With this in mind, the University has established a comprehensive health care program at the Student Health Service (SHS) that includes an outpatient clinic with an array of medical services for acute and chronic conditions, preventative health care services, a full-service pharmacy and multiple health and wellness education programs.

We work in close collaboration with other departments at the University including the Counseling Center and Disability Resources & Services.

Our staff of highly trained, licensed doctors, clinicians, pharmacists, health education professionals and administrators is committed to being the main source of health care away from home for your student. As the primary care facility at the University, we strive to develop a personal relationship with each student to help them maintain a healthy lifestyle and help Pitt be a HEALTHY U!

Please do not hesitate to contact me should you have any questions or concerns regarding the services and programs at the Student Health Service.

Yours in good health,

Marian Vanek, MBA
Director, Student Health Service
